

CHAPTER 5

DEMOGRAPHIC PROFILE AND DATA ANALYSIS OF CHALAPATHER SHYAM GAON AND ROHON SHYAM GAON

Assam is situated in the North Eastern part of India and is also known as the ‘Gateway of the East’. It is a melting pot of different races and cultures. People of different ethnicities and races have migrated to Assam and made it their homeland. With a population of about 3.5 crores; it is a conglomeration of different racial and cultural elements arising out of synthesis and integration which has been continuing since hundreds of years. The languages spoken in Assam belong to three major language groups, i.e. Tibeto-Burman, Indo-Aryan and Tai-Kadai. Hence it would be correct to say that the people of Assam live in a multi-ethnic, multi - linguistic and multicultural society.

The two villages selected as field area for the research fall under Charaideo district of Assam. Charaideo originated from the Tai Ahom word ‘Che Rai Doi’ or ‘Doi Che Rai’ which means the ‘shining city on the hills’. It was the capital of the Ahom kingdom established by the first Ahom king Chaolung Sukapha in 1253 A.D. Charaideo is famous for many historical sites including the ‘Maidams’ or tumuli of Ahom kings and queens which can be compared to the pyramids of Egypt. Charaideo was a part of Sivasagar

district until 15 August 2015 when it was formally declared as a new district. The two villages i.e. Chalapather Shyam Gaon and Rohon Shyam Gaon have been selected as micro field for extensive investigation.

Chalapather Shyam Gaon

Chalapather Shyam Gaon is situated in Sonari revenue Circle of Charaideo district of Assam. It is located in 27.0264°N latitude and 94.9117°E longitude. The village was established in the year 1868 A.D. by few men and women who migrated from Disangpani Shyam Gaon which is also in the Charaideo district. According to oral traditions, the main cause of their migration was increase in population and shortage of arable lands. The villagers wanted to settle near the Safrai River which lies in the South of Disang River as the land was fertile. But the area was full of wild elephants, tigers and other wild animals. The place witnessed frequent tiger attacks as tigers frequented the village and roamed freely there. Hence the place came to be known as Tsu La (Tsu-Tiger, La-land) i.e. the place inhabited or frequented by the tiger. Chala is the corrupted form of the Tai word 'Tsu La'.

Chalapather is situated just sixteen kilometres far from Sonari, which is the district headquarters of Charaideo district. To the Northern side of the village flows the Disang River (tributary of Brahmaputra). Rajgarh, built during the time of Ahom king Susengpha also lays towards the North. To the Southern side lies the Chala Reserve Forest. To the East lies the Khona Tea Estate and to the West lies the Chala Changmai Village and Lakua Tea Estate.

Rohon Shyam Gaon

Rohon Shyam Gaon is situated in the Sonari revenue circle of Charaideo district of Assam. It is located in 27.1106°N latitude and 95.1217°E longitude. The village came into existence in the year 1919 A.D. after few men and women migrated to the present location from Chalapather Shyam Gaon which also lies in the Charaideo district. According to oral traditions, the cause of migration was increase in population in Chalapather village and search of arable land. Rohon Shyam Gaon is situated just twenty one kilometres far from

Sonari, which is the district headquarters of Charaideo District. Nagaland border is only a few kilometres away from Rohon Shyam Gaon.

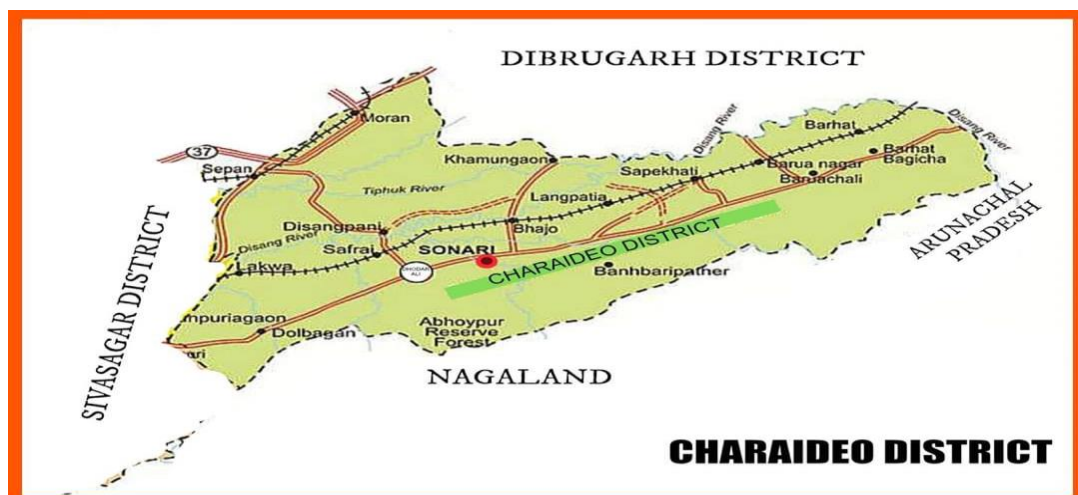

To the North of the village lies Rohon Gohain Gaon and 1 No Rohon Pathar. To the South lies the Timon River. To the Eastern side of the village lays the Bishnupur Tea Estate and to the West lies Rohon Changmai Gaon.

5.1 DEMOGRAPHIC DATA OF CHALAPATHER AND ROHON SHYAM GAON

The researcher has visited all the houses of both the villages and demographic data was collected with the help of a household survey schedule. The important aspects of the field study of Chalapather and Rohon Shyam Gaon have been tabulated below-

Table 5.1 Population Pattern of Chalapather Shyam Gaon

Community	No. of Household	Population Pattern				Total	Sex Ratio M:F
		Male	%	Female	%		
Tai Khamyang	108	268	48.20	288	51.80	556	0.93:1

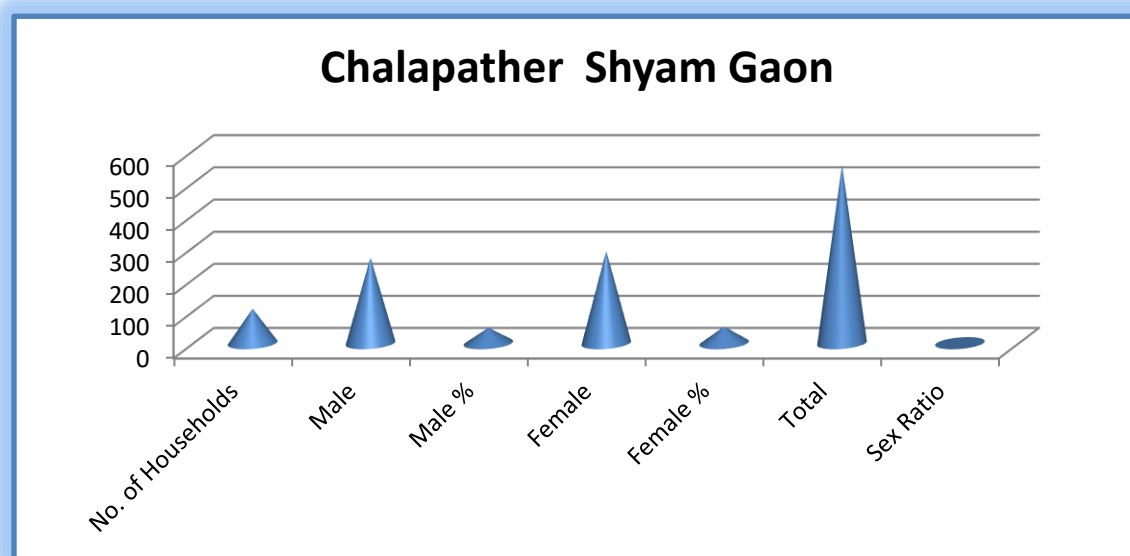

Figure 5.5

Table 5.1 shows that there are 108 households in Chalapather Shyam Gaon with a male population of 268(48.20 %) and a female population of 288(51.80%).The total population of the village are 556 and the male female ratio is 0.93:1.

Figure 5.5 is the graphical representation of the same.

Table 5.1.1 Population Pattern of Rohon Shyam Gaon

Community	No. of Household	Population Pattern				Total	Sex Ratio M:F
		Male	%	Female	%		
Tai Khamyang	44	120	49.59	122	50.41	242	0.98:1

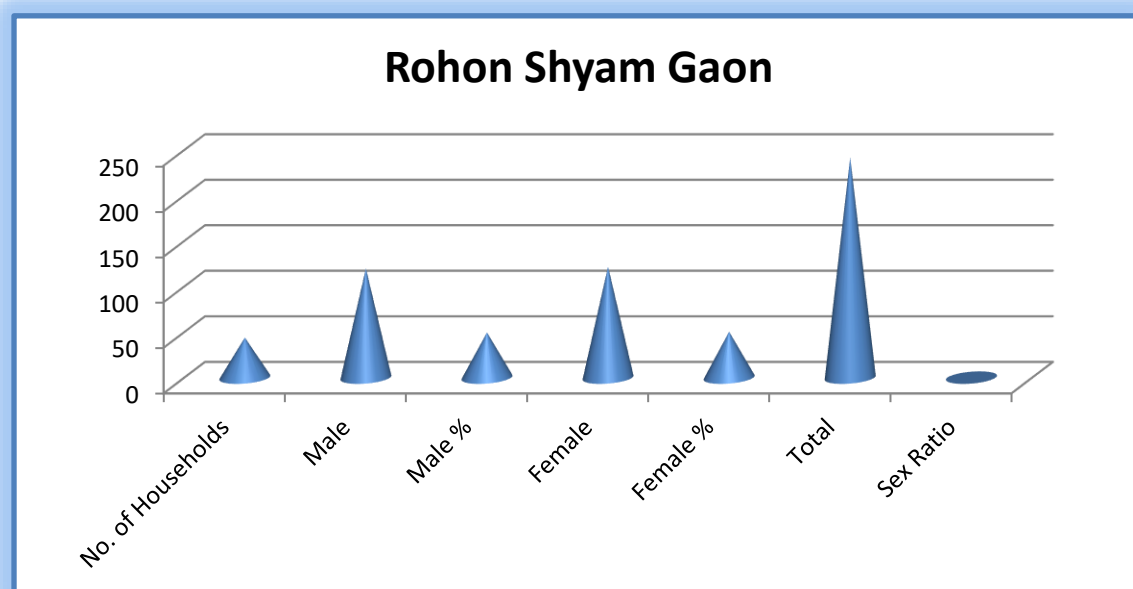

**Figure 5.5.1**

Table 5.1.1 shows that there are 44 households in Rohon Shyam Gaon with a male population of 120(49.59 %) and a female population of 122(50.41%).The total population of the village is 242 and the male female ratio is 0.98:1.

Figure 5.5.1 is the graphical representation of the same.

Table 5.2-Distribution of Population by Age and Sex of Chalapather Shyam Gaon

Age Group	Male	%	Female	%	Total	%
0-4	14	5.22	10	3.47	24	4.32
